Employee Injury Reporting

24/7 Clinical Nurse Consultation for Employee Injury Reporting

Safety is top priority for our patients and our team members. However, injuries and accidents happen. Here's what to do if you're injured or experience an accidental needlestick while at work.

Reporting an injury:

- Alert your shift supervisor as soon as possible.

- Instead of filling out the online Employee Illness/Injury form - call the confidential Sedgwick clinical nurse line at **1-855-537-4468** to review your case and provide immediate next steps.

If you experience a needlestick contact Employee Health at (402) 354-5684 or the Administrative Coordinator (after hours) to complete the internal reporting.

To report an employee injury via the clinical nurse line, please call **1-855-537-4468.** Sedgwick nurses are standing by to assist you 24/7.
